# ADVANTAGES

01

## Free

No network needed, no SIM card needed,  
No fee needed.

02

## Fast

4G push & 2G pull, send SMS fast up to  
100+ SMS / minute.

03

## Precise

Only cellphone nearby will received the  
SMS.

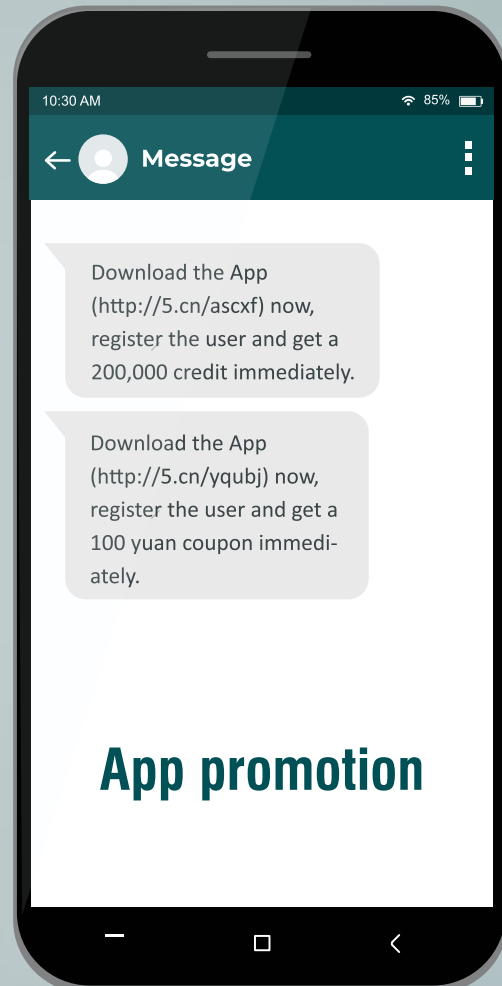

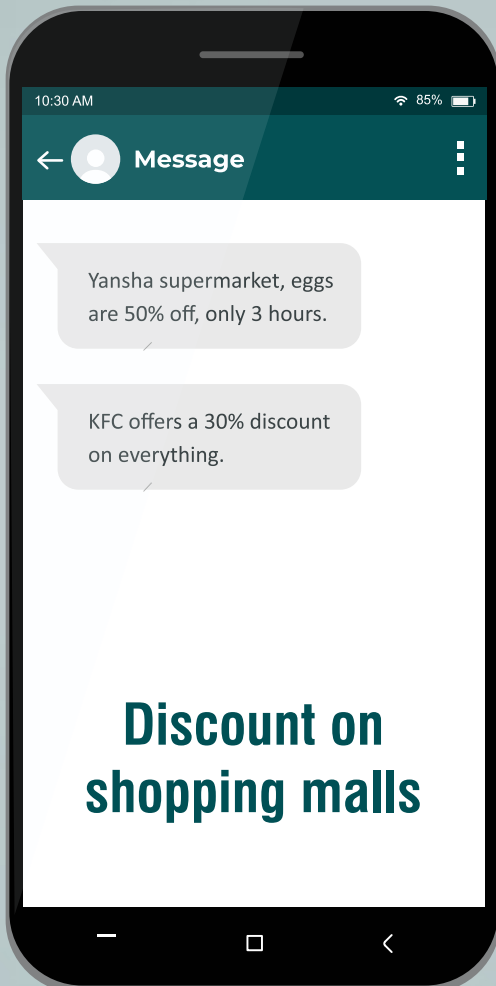

04

## Easy To Use

Just power on the device and configure  
some settings. No network needed, no  
carrie's cooperation needed.

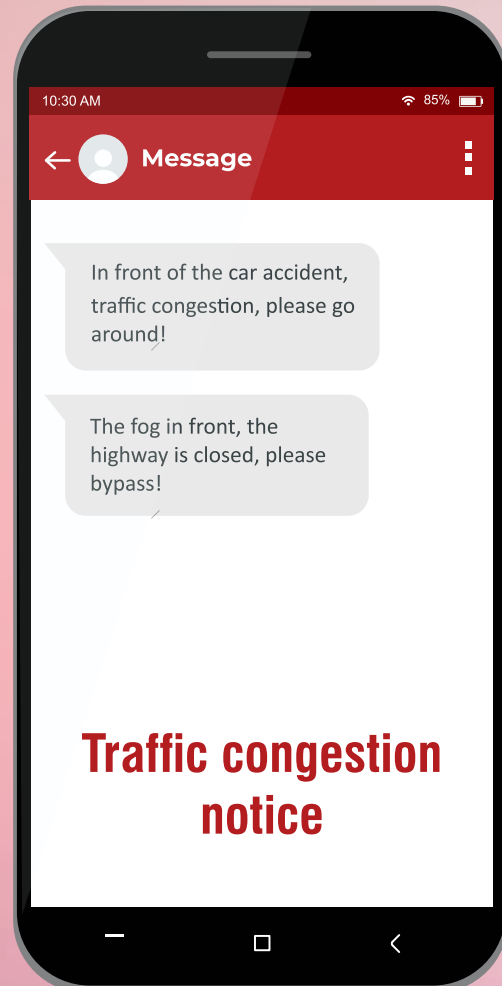

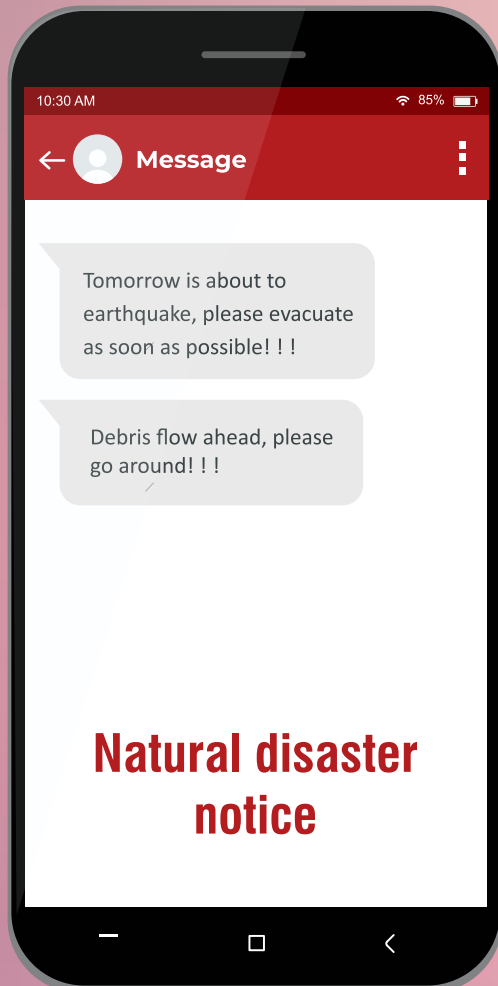

# PROMOTION

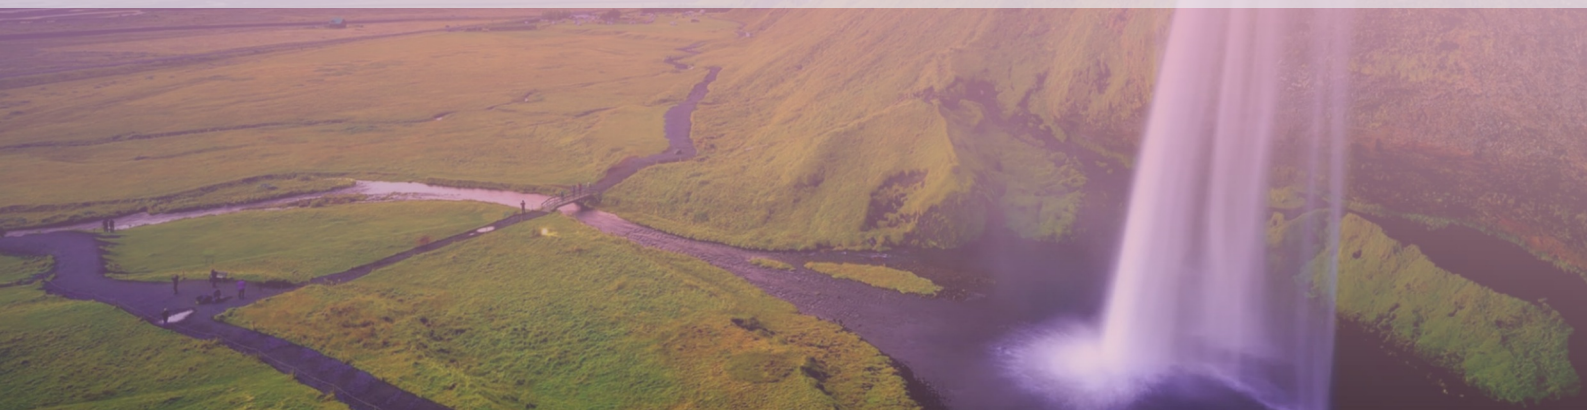

For regional promotion, this is probably the fastest and most accurate way to notify the customers nearby.

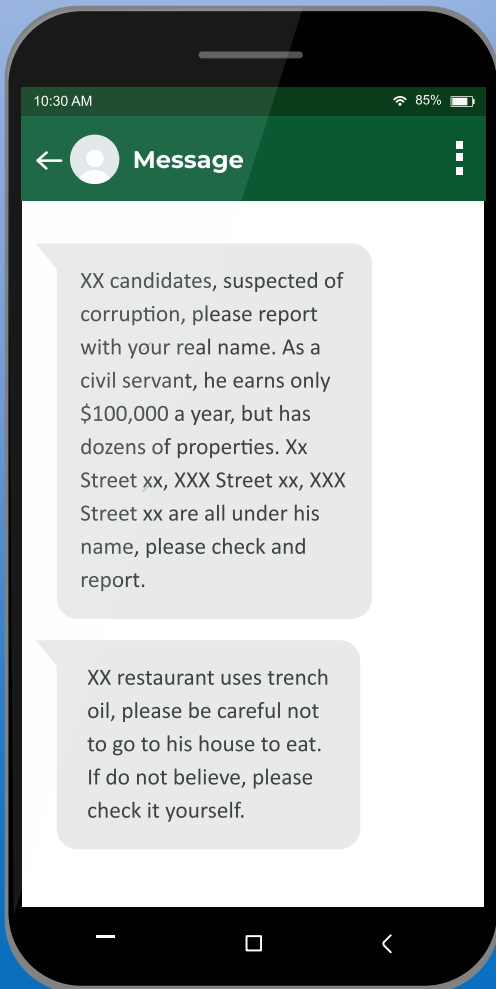

# NOTICE

For regional notifications, this is probably the fastest and most accurate way to notify the citizens nearby.

# VOTE

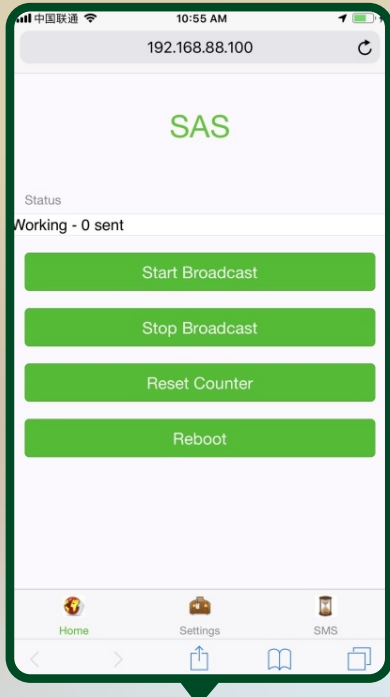

Telling everyone "truth" is often better than spreading "rumors".

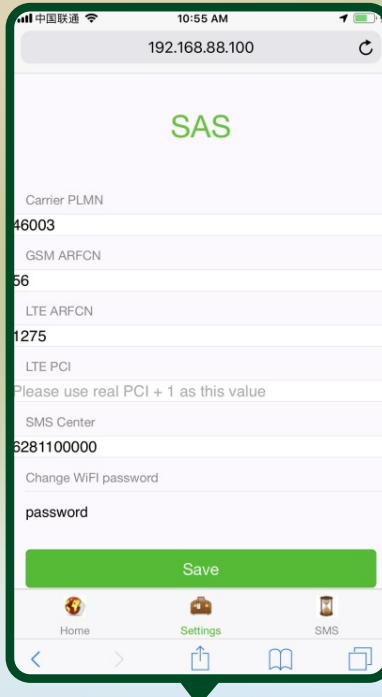

When your competitors have made a "great anger" , you can tell everyone the "truth".

# USAGE

**STEP 1**

**STEP 2**

**STEP 3**

- Power on the SAS.
- Use your cell phone connect WIFI hotspot named "SAS", the input " password" as password.
- When connected, just use your browser to open <http://192.168.88.100/> for operation.
- This is a web interface, so it's easy for using.
- If you changed any settings via Web interface, you must power off and power on the
- SAS to apply the new settings.

# WHERE CAN YOU USE IT?

Only 2G is supported, so in the case of good 3G and 4G signals, most mobile phones may not enter the 2G network. In this situation, please choose 2G+4G solution.

Must be used where the macro 2G signal is better. And the large antenna is better able to stay away from the device. For example, the device is indoors and the large antenna is outdoors.
