FEEDBACKS

I scan in 25 floor in apartemen

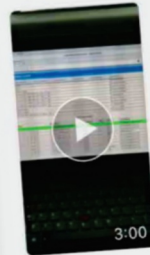

Verint only 500 imsi in 1hour.

Device is good now.. Very very good..

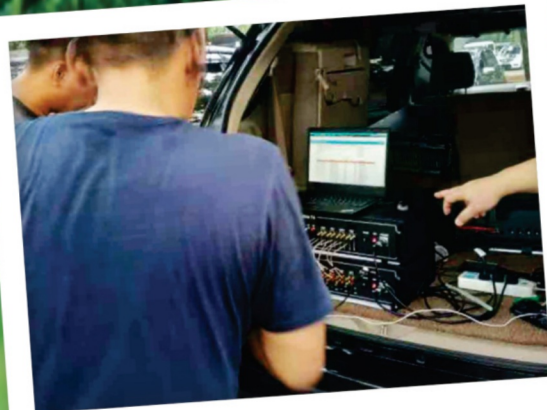

Yeah.. Now your product is best ..

2019年4月3日 上午10:15

Another device (verint and rs) when catpute cant receive phone.

WHERE CAN YOU USE IT

Café

School

Shop

Station

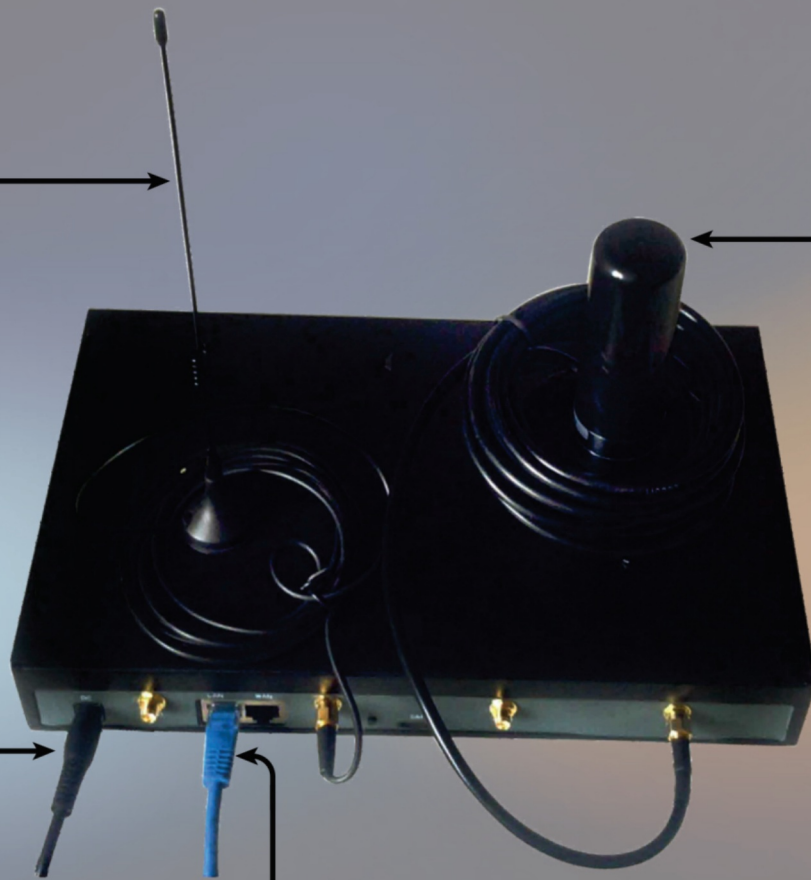

Only 2G is supported, so in the case of good 3G and 4G signals, most mobile phones may not enter the 2G network. In this situation, please choose 2G+4G solution.

Must be used where the macro 2G signal is better. And the large antenna is better able to stay away from the device. For example, the device is indoors and the large antenna is outdoors.
